

Configure IMAP for iPhone or iPad

1. On the iPhone, tap **Settings**.
2. Tap **Mail, Contacts, Calendars**.
3. Tap **Add Account**.
4. Tap **Other**.
5. Tap **Add Mail Account**.
6. Complete the Name, Address (email address), Password and Description fields.
7. Click **Next**.
8. Ensure IMAP is selected.
9. Enter your incoming mail server information:
 - o Hostname is generally mail.mightyhost.ca. If you aren't sure, contact your email hosting company
 - o Username is your full email address
 - o Password is the same password used to access webmail.
10. Enter your outgoing mail server information:
 - o Hostname is generally mail.mightyhost.ca. If you aren't sure, contact your email hosting company
 - o Username is your full email address
 - o Password is the same password used to access webmail.
11. Tap **Next**.
12. The iPhone will attempt to establish an SSL connection to your IMAP and SMTP servers. If this succeeds, you will be done and can proceed to step 13. If this fails, you will see the prompt, "Do you want to try setting up the account without SSL?"
 - o Tap **No**.
 - o Tap **Save**.
 - o When prompted, "This account may not be able to send or receive emails. Are you sure you want to save," tap **Save**.
13. Tap the account you just added (identified by your email address)
14. Scroll down and tap the **SMTP** button.
15. Select the server you just added, identified by the hostname from step 9.
16. Select **Password** for Authentication
17. Select **465** for Server Port.
18. Tap the **SMTP** button to go back.
19. Tap your email address to go back.
20. Tap **Advanced**.
21. Scroll down to Incoming Settings.
22. Select **Password** for Authentication.
23. Select **993** for Server Port.
24. Tap your email address to go back.
25. Tap **Mail** to go back.
26. Tap the **Home** button.
27. Tap the **Mail App** to check your configuration.

Configure POP / IMAP for Android

IMAP will allow you to retrieve emails and folders from SmarterMail and leave the emails on the server.

Follow these steps to create a SmarterMail IMAP Account on your Android Phone

1. If this is the first account you're setting up on the Android device, tap the **Mail Icon**. Otherwise, from the Home screen choose **Mail > Menu > More > New Account**
2. Tap **Manual Setup**.
3. Select the Protocol you want to use. Generally most people use **IMAP**.
4. Complete the **Email Address, Username (also email address) and Password** fields.
5. In the IMAP Server field type in **mail.mightyhost.ca**.
6. Ensure Security type is **SSL**.
7. Ensure Server port is **993**.
8. Click Next.
9. Enter your **Outgoing Server Settings** :
10. For the Username field type in your full **email address**.
11. Type in your password
12. In the SMTP Server field type in **mail.mightyhost.ca**.
13. Leave Security as **SSL**
14. Change the Server port to **465**
15. Click next and then save your details.
16. Your mail account is now ready for use.
